MARINE SAFETY ADVISORY No. 23-16 Revised

To: Owners/Operators, Masters, Nautical Inspectors, Recognized Organizations

Subject: REQUIREMENTS TO MEET PROVISIONS OF THE INTERNATIONAL CONVENTION ON STANDARDS OF TRAINING, CERTIFICATION AND WATCHKEEPING (STCW) MANILA AMENDMENTS

Date: 05 October 2016

Reference: STCW 1978 AS AMENDED BY THE MANILA AMENDMENTS (The Manila Amendments)

MI-118 Seafarer Certification Requirements

The provisions of the Manila Amendments will come into full effect on 01 January 2017. All seafarer documentation issued by the Republic of the Marshall Islands (RMI) Maritime Administrator (the “Administrator”) will be required to comply with the provisions of the Manila Amendments. Seafarers will need to submit documentary evidence of compliance with these provisions in any application that is submitted to the Administrator for the issuance of seafarer documentation. The Administrator will start requiring compliance with these provisions on 01 October 2016, to ensure that documents issued will be valid after 31 December 2016. The following outlines each new requirement, and what will be accepted as documentary evidence to satisfy the Manila Amendment provisions.

Answers to questions regarding the implementation of the Manila Amendments and the Administrator’s procedures can be found on our website at www.register-iri.com. Please refer to the FAQ section in the SEAFARER DOCUMENTATION drop down list.

1.0 DECK OFFICERS

1.1 All deck officers will be required to provide evidence they have received approved training in:

.1 Bridge Resource Management (BRM);

.2 Leadership and Teamwork/Managerial training; and

.3 Electronic Chart Display and Information System (ECDIS).

This MSA expires one (1) year after its issuance, unless otherwise noted, extended, superseded, or revoked.
1.2 BRM, and Leadership and Teamwork/Managerial Training

BRM and Leadership and Teamwork/Managerial training are required in the tables of Section A of the STCW Code. Leadership and Teamwork training is required for operational level officers. Leadership and Managerial training is required for management level officers. Specifics are found in tables A-II/1, A-II/2, and A-II/3. Evidence that an officer is qualified in BRM, and Leadership and Teamwork/Managerial training, can be provided by any of the following:

.1 Submission of a nationally issued Certificate of Competency from the administration of a nation with which the Administrator has an undertaking that expires after 31 December 2016; or

.2 Submission of a training certificate from an accepted facility whose program has been approved as compliant with the above tables by the administration of a nation that is on the International Maritime Organization (IMO) white list. The certificate must bear the proper STCW references and the administration approval; or

.3 Submission of a BRM certificate from a course that includes the Leadership and Teamwork/Managerial training, will serve as evidence for both qualifications.

1.3 ECDIS

Generic ECDIS training is required in the tables of Section A of the STCW Code. Specifics are found in tables A-II/1, A-II/2, and A-II/3. Evidence that an officer is qualified in ECDIS can be provided by any of the following:

.1 Submission of a nationally issue Certificate of Competency (CoC) that expires after 31 December 2016 and bears no limitations from the administration of a nation with which the Administrator has an undertaking; or

.2 Submission of a training certificate from an accepted facility whose program has been approved as compliant with the above tables by the administration of a nation that is on the IMO white list. The certificate must bear the proper STCW references and the administration approval.

ECDIS training is required at two (2) levels.

.1 Generic ECDIS training is required to be done in a shoreside training facility whose course has been approved by the administration of a nation on the IMO white list; and
.2 Type specific familiarization with the specific equipment on board a ship can be done either on board or ashore but must familiarize the deck officer with the specific unit he/she will be using on board. This training should be done in accordance with the Safety Management System procedures of the vessel.

Deck officers who cannot provide sufficient documentary evidence of having completed the required Generic ECDIS training will receive a limitation to vessels that are not fitted with ECDIS on their CoC or endorsements.

2.0 ENGINEERING OFFICERS (including Electro-Technical Officers (ETOs))

2.1 All engineering officers will be required to provide evidence they have received approved training in:

.1 Engine Room Resource Management (ERM);
.2 Leadership and Teamwork/Managerial training; and
.3 High Voltage (HV) systems

2.2 ERM and Leadership and Teamwork/Managerial Training.

ERM, and Leadership and Teamwork/Managerial training, are required in the tables of Section A of the STCW Code. Leadership and Teamwork training is required for operational level officers. Leadership and Managerial training is required for management level officers. Specifics are found in tables A-III/1, A-III/2, A-III/3 and A-III/6. Evidence that an officer is qualified in ERM and Leadership and Teamwork/Managerial can be provided by any of the following:

.1 Submission of a nationally issued CoC from the administration of a nation with which the Administrator has an undertaking that expires after 31 December 2016; or

.2 Submission of a training certificate from an accepted facility whose program has been approved as compliant with the above tables by the administration of a nation that is on the IMO white list. The certificate must bear the proper STCW references and the administration approval; or

.3 Submission of an ERM certificate from a course that includes the Leadership and Teamwork/Managerial training as applicable will serve as evidence for both qualifications.
2.3 HV Systems

Training in HV systems is required in the tables of Section A of the STCW Code. Specifics are found in tables A-III/1, A-III/2, A-III/3, and A-III/6. Evidence that an officer is qualified in HV systems can be provided by any of the following:

.1 Submission of a nationally issued Certificate of Competency that expires after 31 DEC 2016 and bears no limitations from the administration of a nation with which the Administrator has an undertaking; or

.2 Submission of a training certificate from an accepted facility whose program has been approved as compliant with the above tables by the administration of a nation that is on the IMO white list. The certificate must bear the proper STCW references and the administration approval.

Engineering officers who cannot provide sufficient documentary evidence they have completed the required HV training will receive a limitation to vessels that are not fitted with HV systems on their CoC or endorsements.

3.0 NEW CAPACITIES

3.1 Electro-Technical Officer (ETO), STCW Regulation III/6

RMI endorsements for this officer capacity are optional. However, if a seafarer is serving on board an RMI vessel in the capacity of ETO, he/she must be able to provide documentary evidence to authorities that he/she is qualified. To receive an RMI ETO endorsement, a nationally issued CoC must be submitted that contains the STCW III/6 reference. ETO endorsements will be issued at the operational level.

3.2 Able Seafarer – Deck (ASD), STCW Regulation II/5

After 01 January 2017, Able Seafarers will be required to be qualified in this capacity. The possession of a nationally issued STCW II/4 rating forming part of a navigation watch certificate and an STCW II/5 ASD certificate are mandatory to receive the RMI ASD certificate. The possession of a nationally issued ASD certificate will offer evidence the seafarer also possesses Proficiency in Survival Craft and Rescue Boats other than Fast Rescue Boat training, as required for this capacity.

3.3 Able Seafarer – Engine (ASE), STCW Regulation III/5

The possession of a nationally issued STCW III/4 rating forming part of an engineering watch certificate and an STCW III/5 Able Seafarer Engine certificate are mandatory to receive the RMI ASE certificate.
3.4 Electro-technical Rating (ETR), STCW Regulation III/7

RMI certificates for this rating are optional. However, seafarers serving on board in this capacity must be able to provide documentary evidence to authorities that they are qualified. To receive an RMI certificate as ETR, the seafarer must submit a nationally issued certificate that bears the STCW III/7 reference.

4.0 TRAINING

4.1 General training

All training certificates will be required to bear the applicable STCW references. Additionally, they must bear the approval that the course from which the certificate is generated is in compliance with the provisions of the Manila Amendments. This approval must be from the administration of a party that is acceptable to the Administrator and that is on the IMO white list.

After 01 January 2017, most certificates submitted to the Administrator in application submissions will be required to be dated within the five (5) years prior to the date on the application. This includes both original and refresher training certificates. Exceptions to this requirement as noted in Table B-1/2 of the STCW Code and which do not need refresher training are:

.1 rating certificates;
.2 support level tanker certificates;
.3 medical first aid and medical care certificates; and
.4 ship security officer, security awareness, and seafarers with designated security duties certificates.

4.2 Refresher training

Refresher training in some competencies is required by the Manila Amendments. The Administrator will follow Table B-1/2 found in Part B of the STCW Code. Some refresher training can be done on board. This would include training that does not require the seafarer to demonstrate proficiency; for example, Personal Safety and Social Responsibilities could be a lecture or Computer Based Training (CBT) module. Other training, such as Personal Survival Techniques and Fire Fighting, require a demonstration of proficiency and must be done shore-side. The acceptability of all refresher training is subject to approval by the Administrator.
4.3 Security training

There are two (2) new training competencies required by the Manila Amendments as follows:

.1 Security Awareness training is required by STCW Regulation VI/6. All vessel personnel must be trained in security awareness. This can be through an approved shoreside or CBT training course, or qualifications can be met by at least six (6) months experience on board a vessel that exercises an active ship security plan. Qualifications for security awareness can also be met by successfully completing a course for those with designated security duties, as described below, or for ship security officer.

The RMI certificate for this competency is optional. However, all personnel must be able to provide documentary evidence to authorities that they are qualified. To receive the RMI certificate, either a training certificate or evidence the seafarer has the above experience on a vessel with an active ship security plan must be submitted.

.2 Seafarers with Designated Security Duties are required by STCW Regulation VI/6. Vessel personnel who are designated in the ship security plan as having security duties must be qualified in this competency. This can be through an approved shoreside or CBT training course, or qualifications can be met by at least six (6) months experience on board a vessel that exercises an active ship security plan in which the seafarer had specified security duties. Qualifications for security awareness can also be met by successfully completing a course for ship security officer.

The RMI certificate for this competency is optional. However, all personnel must be able to provide documentary evidence to authorities that they are qualified. To receive the RMI certificate, either a training certificate or evidence the seafarer has the above experience on a vessel with an active ship security plan must be submitted.

4.4 Tanker training

.1 Oil and Chemical Tanker Basic Training; STCW Regulation V/1-1.1-2

Officers and ratings assigned specific duties and responsibilities related to cargo or cargo equipment on oil or chemical tankers must hold a certificate for basic training in oil and chemical tanker cargo operations. Note that liquefied gas is no longer included in this training. Also note that shoreside firefighting (required by STCW ’95) is now included in this training.
Seafarers who work on oil and/or chemical tankers must be certificated by the Administrator at the appropriate function level (refer to RMI Publication MI-118 for requirements).

RMI certificates are issued only for one (1) type of tanker and are not combined. To receive an RMI certificate for either oil or chemical tankers at the support level, the seafarer must submit evidence that he/she has successfully completed the above course.

.2 Liquefied Gas Tanker Basic Training; STCW Regulation V/1-2.1-2

Officers and ratings assigned specific duties and responsibilities related to cargo or cargo equipment on liquefied gas tankers must hold a certificate for basic training in liquefied gas tanker cargo operations. Note that shoreside fire-fighting (required by STCW ’95) is now included in this training.

Seafarers who work on liquefied gas tankers must be certificated by the Administrator at the appropriate function level (refer to RMI Publication MI-118 for requirements).

RMI certificates are issued only for one type of tanker and are not combined. To receive an RMI certificate for liquefied gas tankers at the support level, the seafarer must submit evidence he/she has successfully completed the above course.

.3 Advanced Oil Tanker Training; STCW Regulation V/1-1.3-4

Masters, chief engineer officers, chief mates, second engineer officers, and any person with immediate responsibility for loading, discharging, care in transit, handling of cargo, tank cleaning, or other cargo-related operations on oil tankers must hold a certificate in advanced training for oil tanker cargo operations that has been issued by the Administrator (STCW Regulation V/1-1.7) at the appropriate function level (refer to RMI Publication MI-118 for requirements).

To receive an RMI certificate for a management or operational level certificate, the officer must submit evidence that he/she has successfully completed the above course. Management level certificates also will require the officer to provide documentary evidence that he/she has at least three (3) months experience on an oil tanker.

.4 Advanced Chemical Tanker Training; STCW Regulation V/1-1.5-6

Masters, chief engineer officers, chief mates, second engineer officers, and any person with immediate responsibility for loading, discharging, care in transit,
handling of cargo, tank cleaning or other cargo-related operations on chemical tankers must hold a certificate in advanced training for chemical tanker cargo operations that has been issued by the Administrator (STCW Regulation V/1-1.7) at the appropriate function level (refer to RMI Publication MI-118 for requirements).

To receive an RMI certificate for a management or operational level certificate, the officer must submit evidence that he/she has successfully completed the above course. Management level certificates also will require the officer to provide documentary evidence that he/she has at least three (3) months experience on a chemical tanker.

Advanced Liquefied Gas Tanker training; STCW Regulation V/1-2.3-4

Masters, chief engineer officers, chief mates, second engineer officers, and any person with immediate responsibility for loading, discharging, care in transit, handling of cargo, tank cleaning or other cargo-related operations on liquefied gas tankers must hold a certificate in advanced training for liquefied gas tanker cargo operations that has been issued by the Administrator (STCW Regulation V/1-2.5) at the appropriate function level (refer to RMI Publication MI-118 for requirements).

To receive an RMI certificate for a management or operational level certificate, the officer must submit evidence that he/she has successfully completed the above course. Management level certificates also will require the officer to provide documentary evidence that he/she has at least three (3) months experience on a liquefied gas tanker.
