As it is known that, Turkish flag vessels has succeeded to enter white list of Paris MOU in 2008 and in order to maintain this success, our under secretariat is giving highest performance together with maritime sector.
Most of the deficiencies which are found during the port state inspections of Turkish flag vessels are related with insufficient implementations of ISM Code. For that reason, additional audits are being carried out by ROs to the detained vessels at PSC inspections and their management companies.
Also, we have circulated our regulation about ISM Code for Turkish vessels on the formal newspaper (ref.no.27389, 27.10.2009 dated) and entered in force at the same date.
