

Type Approval of Crankcase Oil Mist Detection Arrangements

Amended Guidance

Guidance for the Survey and Construction of Steel Ships Part D

Guidance for the Approval and Type Approval of Materials and Equipment for Marine Use

Outline

These amendments modify the requirements for type approval test of crankcase oil mist detection arrangements based on the revision of IACS Unified Requirements M67 (Rev.1) which was adopted by IACS in October 2006. They clarify the procedures for functional tests of the arrangements.
