

Type Approval of Crankcase Explosion Relief Valves

Amended Guidance

Guidance for the Survey and Construction of Steel Ships Part D

Guidance for the Approval and Type Approval of Materials and Equipment for Marine Use

Reason for Amendment

This amendment modifies the requirements for the type approval test of crankcase explosion relief valves based on the Rev.1 and Rev.2 of IACS Unified Requirements M66. It has clarified the procedures for the explosion tests of the valves.

Outline of Amendment

- (1) Requirements related to the test method and test facilities for the approval test of crankcase explosion relief valves have been amended in accordance with the revisions made to IACS UR M66.
- (2) Requirements for design series qualification based on IACS UR M66 have been added.
