

# **Requirements of Thickness Measurements for Ships Carrying Liquefied Gases in Bulk**

## **Amended Rules**

Rules for the Survey and Construction of Steel Ships Part B

## **Reason for Amendment**

IACS developed Unified Requirements concerning hull surveys for liquefied gas carriers and adopted them as UR Z7.2 in May, 2007. The Society amended the Rules based on UR Z7.2 on 27 February 2008.

However, a part of the amended requirements for thickness measurements based on UR Z7, which is applicable irrespective of ship type, is unclear on applicable members.

Taking these circumstances into account, the relevant requirements are amended.

## **Outline of Amendment**

Applicable members of thickness measurements of liquefied gas carriers are revised based on UR Z7.
