

The Treatment of Steel Coils and Steel Plates made from Steel Coils

Amended Rules and Guidance

Rules for the Survey and Construction of Steel Ships Part K

Guidance for the Survey and Construction of Steel Ships Part K

Reason for Amendment

Recently, some shipyards, in an attempt to stabilize the supply of steel materials, have requested to use materials that have been shipped as steel coils and uncoiled and cut by third-parties for certain thin steel plates such as car deck plates of car carriers.

For this reason, relevant provisions have been amended so that NK can approve steel coils as hull structural rolled steels and treat steel plates from steel coils.

Outline of Amendment

Requirements related the treatment of steel coils and steel plates from steel coils have been provided.
