

## **Test Standards for Circuit-Breakers**

### **Amended Guidance**

Guidance for the Approval and Type Approval of Materials and Equipment for Marine Use

### **Reason for Amendment**

The Guidance for the Approval and Type Approval of Materials and Equipment for Marine Use specifies that type tests for circuit-breakers are to be implemented in accordance with the procedures specified in either IEC 60947 or IEC 60157; however, IEC 60157 is no longer in force which means that all references made to it in the NK Rules need to be deleted.

In addition, some of the wording of the relevant requirements was amended to make it easier to understand.

### **Outline of Amendment**

The main contents of this amendment are as follows.

- (1) Deleted references to the standard IEC 60157.
- (2) Amended the wording of relevant requirements.

### **Amended Requirements**

Guidance for the Approval and Type Approval of Materials and Equipment for Marine Use  
Part 8: 3.2.1
