

Amendment on 27 June 2024

Resolved by Technical Committee on 30 January 2024

Unified Interpretation of MARPOL ANNEX VI

(Electronic Bunker Delivery Notes)

Object of Amendment

Guidance for Marine Pollution Prevention Systems

Reason for Amendment

Appendix V of MARPOL Annex VI specifies the information (e.g. sulphur percentage) that is to be included in the bunker delivery notes (BDN) required to be provided in accordance with Regulation 18. This information has already been incorporated by the Society into the NK Rules.

In recent years, the use of electronic documents as part of a transition towards paperless business operations has been increasing throughout many industries worldwide, including the maritime industry. These days many ship-related documents, such as certificates, are now available in electronic formats.

In response, the IMO's Marine Environment Protection Committee discussed at its 80th Session (MEPC80) in July 2023 how requirements related to more traditional paper documents should be applied to electronic documents. As a result of its discussions, the MEPC revised the IMO's unified interpretation (UI) to MARPOL Annex VI (MEPC.1/Circ.795/Rev.7) to specify that electronic documents can be used in addition to hard copy documents with respect to Port State Control (PSC) and other matters for bunker delivery notes in consideration of the convenience electronic documents provide. The revised UI was adopted as MEPC.1/Circ.795/Rev.8.

Therefore, relevant requirements are amended in accordance with MEPC.1/Circ.795/Rev.8.

Outline of the Amendment

Specifies that electronic bunker delivery notes may be used in addition to hard copy versions as long as verification, such as tracking number or QR code, is possible and protection against edits, modifications or revisions is provided.

Effective Date and Application

Effective date of this amendment is 27 June 2024.

ID: DD23-26
