

# **Interval between Open-up Examinations of Valves and Cocks at Docking Surveys**

## **Object of Amendment**

Rules for the Survey and Construction of Steel Ships Part B

## **Reason for Amendment**

IACS Unified Requirement (UR) Z3 (Rev.8) requires open-up examinations of valves and cocks be carried out at docking surveys. The Society has already incorporated this requirement into Part B of its Rules for the Survey and Construction of Steel Ships.

IACS UR Z3 (Rev.8) further specifies that valves and cocks need not be opened up more than once within each five-year Special Survey period unless considered necessary by the surveyor-in-charge. The NK Rules, on the other hand, specify that the valves and cocks may not require open-up examinations at the discretion of the surveyor-in-charge provided they were opened up and found to be in good order at the previous docking survey. NK rules are, therefore, not consistent with IACS UR Z3 (Rev.8).

Accordingly, relevant requirements are amended to be consistent with IACS UR Z3 (Rev.8).

## **Outline of the Amendment**

Amends requirements to clarify that valves and cocks need not be opened up more than once within each five-year Special Survey period unless considered necessary by a surveyor.

## **Effective Date and application**

Effective date of this amendment is 1 January 2026.

ID:DX25-04
